DETAILED ACTION

Fees

1. Claims 1, 15, 16 and 17 are independent claims. Since claims 15 and 16 do not limit the scope of their parent claim, but instead expand it, they must be paid for as independent claims. This brings the number of independent claims to 4, the applicant is charged $(4-3)*\$200 = \200 . See 37 CFR 1.16(h).

Election/Restrictions

2. The applicant is required under 35 U.S.C. 121 to elect one closed ended set of elements enumerated in claim 2 as species for the genus of "determining information". Species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, claim 1 is generic), wherein the determining information is a closed-ended combination of:

- A. position
- B. velocity
- C. acceleration
- D. dimension
- E. shape
- F. color
- G. movement direction

3. Upon election of one of species above, applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, claim 1 is generic), regarding claim 3, wherein the sensor measures:

- a Electromagnetic waves
- b Pressure waves

4. The applicant is required under 35 U.S.C. 121 to elect one closed ended set of elements enumerated in claim 6 as species for the genus of "warning information". Species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, claim 5 is generic), wherein the warning information is a closed-ended combination of:

- (1) Current movement parameters
- (2) Expected movement parameters
- (3) Current position

5. Upon election of one of species above, applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, claim 1 is generic), regarding claim 8, wherein the automatically determining information is performed:

- (A) Permanently (presumably meaning continuously)

(B) In space intervals

(C) In time intervals

6. The applicant is required under 35 U.S.C. 121 to elect one closed ended set of elements enumerated in claim 10 as species for the genus of output information. Species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, claim 1 is generic), wherein the output information of the object is a closed-ended combination of:

- 1) A particular
- 2) position
- 3) velocity
- 4) acceleration
- 5) dimension
- 6) shape
- 7) color
- 8) movement direction

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement (e.g., **A, B and G only, a, (1), (A), and 5) and 6) only**), listing of all claims readable thereon, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
